University of Utah is committed to commercializing new technologies and inventions from discoveries made and developed at the U. As a recognized leader, the Center for Technology & Venture Commercialization (TVC) drives value from an invention’s discovery to its transformation into practical use. We accomplish this by supporting innovative research through a comprehensive suite of services. In addition, TVC catalyzes ecosystem stakeholders to promote investment and company-building from University innovations.

**DISCLOSURES**
- **ANNUALLY**: 200+
- **STARTUPS**: 300
- **LICENSES**: 500+
- **JOBS CREATED**: 16,000
- **ISSUED PATENTS**: 1,300
- **ANNUAL ECONOMIC IMPACT**: $750M

**NOTABLE SPINOUTS**

**STARTUP 360™**
TVC has developed a comprehensive array of programs to support each facet of a company’s early stages of growth – we call it StartUp 360™. These programs “surround” a startup company with experienced entrepreneurs, investors, services and relationships. Every company we support has exclusive and customized access to StartUp 360™ that helps prepare and position them for success.

**UNIVERSITY SEED FUND**
The University of Utah Seed Fund fills a funding gap in the commercialization process between invention disclosure and the license of a technology. The funds are to be used to accomplish critical commercialization milestones for technologies invented at University of Utah which are not yet licensed, in order to attract licensees, entrepreneurs and investors. The funding process is managed by TVC based upon milestone-based commercialization projects.

TVC provides comprehensive commercialization support to faculty, students and staff including:
- Invention management
- Patent prosecution
- Licensing
- Startup formation
- Equity management
