Research Education offers continuing education and training opportunities designed to support, develop and maintain a standardized body of knowledge and best practice methodology for all research personnel at the University of Utah. The curriculum includes traditional classes and lectures, interactive workshops, online instruction and educational resources provided to ensure compliance with federal regulations and to enhance the overall productivity of researchers.

**MISSION**

To provide research support at the University of Utah by providing accessible and relevant education and training to the research community.

**VISION**

**SERVICES**

- **Principal Investigator Knowledge Assets (PIKA)**
  PIKA is a new resource for faculty. Opportunities for training in the Responsible Conduct of Research and Rigor & Reproducibility are available.

- **Grant Writing Academy**
  An intensive 3-day program for faculty planning to submit proposals to federal, scientific institutes and agencies.

- **Lab Safety**
  The Lab Safety program is a new initiative to improve the quality of research at the University. A course to train lab members will be available to PI's.

- **Research Administration Training Series (RATS)**
  RATS provides new and experienced research administrators with an opportunity to learn about conducting research at the University.
