### UNIVERSITY OF UTAH RESEARCH ALERT LEVELS WITH COVID-19 PROTOCOLS

<table>
<thead>
<tr>
<th>Allowable research activities</th>
<th>GREEN Normal research operations</th>
<th>YELLOW Modified research activities</th>
<th>ORANGE Limited research activities</th>
<th>RED Essential research activities only</th>
</tr>
</thead>
</table>
| Routine operations in compliance with EHS guidelines and requirements. | • Only activities that can be safely conducted with appropriate situation-specific safety protocols, along with normal EHS guidelines, are permitted.  
• High hazard operations should be minimized. | • Only activities that can be safely conducted with limited personnel and appropriate situation-specific safety protocols, along with normal EHS guidelines, are permitted.  
• High hazard operations should be minimized. | • Priority clinical and pre-clinical research.  
• Animal care or priority animal research.  
• Maintenance of other live organisms (e.g. plants, fungi, non-vertebrates) and cell cultures.  
• Maintenance of equipment/infrastructure that will be damaged by interruptions.  
• Research functions necessary for health and safety.  
• Other urgent research activities if approved by the VPR. |

| COVID-19 Laboratory protocols | You may only come to campus if:  
• You have had no fever for at least 72 hours (that is three full days of no fever without the use medicine that reduces fevers) | You may only come to campus if the conditions listed under GREEN are met, AND:  
• Accommodations should be made so that high risk personnel can work from home.  
• Maintain at least 6-feet of | You may only come to campus if the conditions listed under GREEN are met, AND:  
• Anyone who can work remotely should do so.  
• Accommodations should be made for high risk personnel to work from home. | You may only come to campus for essential research if the conditions listed under GREEN are met, AND:  
• Anyone who can work remotely should do so.  
• All meetings should be held electronically. |

| COVID-19 human subjects research protocols | For both staff and subjects:  
- You have had no fever for at least 72 hours (that is three full days of no fever) | You may only conduct human subjects research if conditions in GREEN are met  
- Remote mechanisms for performing participant | You may only conduct human subjects research if conditions in GREEN are met  
- Participant research visits are performed remotely | Participant research visits must be performed remotely whenever possible.  
- If a research visit cannot be performed remotely, |

| AND  
- other **symptoms** have improved (for example, when your cough or shortness of breath have improved)  
AND  
- at least 10 days have passed since your symptoms first appeared.  
AND  
- You have not had contact with anyone who is COVID positive (including the 5 days before they were positive) for 14 days. | separation as often as possible. For example, only one person per bay or one person per half bay, depending on lab configuration.  
- In person interactions should be limited to <50 people.  
- Everyone is expected to follow state guidelines for face coverings.  
- Each lab should maintain a check list of surfaces to sanitize at the start and end of each shift, including shared equipment and fridge doors/handles, etc. | • Small rooms (e.g., office, procedure room, tissue culture room) should have no more than one occupant.  
- Always maintain at least 6-feet of separation between people AND work areas. For example, only one person per bay or one person per half bay, depending on lab configuration.  
- Everyone is expected to follow state guidelines for face coverings.  
- In person interactions should be limited to <10 people with at least 6 feet of separation at all times.  
- To avoid physical overlap, time at the lab should be scheduled, such as through calendaring.  
- Each lab should maintain a check list of surfaces to sanitize at the start and end of each shift, including shared equipment and fridge doors/handles, etc. | • Small rooms (e.g., office, procedure room, tissue culture room) should have no more than one occupant.  
- Always maintain at least 6-feet of separation. For example, only one person per bay or one person per half bay, depending on lab configuration.  
- State guidelines regarding face coverings apply.  
- To avoid physical overlap, time at the lab should be scheduled, such as through calendaring.  
- Each lab should maintain a check list of surfaces to sanitize at the start and end of each shift, including shared equipment and fridge doors/handles, etc. |

AND

- You have not had contact with anyone who is COVID positive (including the 5 days before they were positive) for 14 days.
- Ensure that the Field Research Safety Plan identifies a local facility where medical assistance can be sought.

- Maintain at least 6-feet of separation as often as possible.
- Everyone is expected to follow state guidelines for face coverings.
- Maintain a check list of surfaces to sanitize at the start and end of each shift, including shared equipment and field supplies.
- Field supplies must include adequate PPE and supplies (e.g. disinfectant) to meet these requirements, including a thermometer.

6-feet of separation.

- Everyone is expected to follow state guidelines for face coverings.
- While indoors, small rooms should have no more than one occupant.
- Maintain a check list of surfaces to sanitize at the start and end of each shift, including shared equipment and field supplies.
- Field supplies must include adequate PPE and supplies (e.g. disinfectant) to meet these requirements, including a thermometer.

You may only come to campus if:

- You have had no fever for at least 72 hours (that is three full days of no fever without the use of medicine that reduces fevers) AND other symptoms have improved (for example, cough and shortness of breath).

AND

- You have not had contact with anyone who is COVID positive (including the 5 days before they were positive) for 14 days.
- Ensure that the Field Research Safety Plan identifies a local facility where medical assistance can be sought.

- Maintain at least 6-feet of separation as often as possible.
- Everyone is expected to follow state guidelines for face coverings.
- Maintain a check list of surfaces to sanitize at the start and end of each shift, including shared equipment and field supplies.
- Field supplies must include adequate PPE and supplies (e.g. disinfectant) to meet these requirements, including a thermometer.
