Driven to improve patient care, our nurse researchers study practical healthcare questions. As Utah’s flagship for nursing education, the College of Nursing plays a vital role in training future nurse scientists and leaders with pioneering informatics and nurse midwifery programs and the only PhD-granting program in the state of Utah. With a growing grant portfolio and a recent #2 ranking for National Institutes of Health funding, we’ve established our reputation as a rising hub for interdisciplinary research and innovation in healthcare.

**Areas of Excellence**

**Training Grants**
- NIH-funded training program ($1.8 million) in Cancer, Caregiving and End-of-Life (T32 grant)
- HRSA-funded primary care training program ($2.8 million) targeted at rural healthcare providers

**Informatics and Technologies**
- NIH-funded Utah PRISMS Center ($5.5 million) focused on integrating air quality sensor measurements into pediatric asthma research
- AHRQ-funded study ($1.3 million) developing and evaluating a new health information exchange system for poison control centers
- Multiple NCI-funded studies ($10.8 million) developed Symptom Care at Home, an innovative approach to home monitoring of symptoms in cancer patients
- NINR-funded study ($2.2 million) examining family caregiver interactions with hospice care teams

**Caregiver Research**

**Direct Research Expenditures**

- $24M Grant Portfolio
- $5.8M Annual Extramural Grants
- 30% Extramural Funding Success Rate
- #23 NIH Funding
- 7 Endowed Chairs
- 9 VPCAT Scholars
- 23 Fellows (FAAN, AGHE, FACNM)
