Research Dean Meeting Announcements

November 12th, 2020
Researchers interested in submitting to a limited submission opportunity must apply to an internal competition and be selected by the VPR Office for full proposal submission to the opportunity's sponsor. Internal competitions help verify the eligibility of an applicant and ensure that another application has not already been selected to submit to a specific limited submission opportunity. The University of Utah uses InfoReady Review software to host and manage all internal competitions.

If a faculty member is interested in applying to a limited submission opportunity that is NOT published on InfoReady, they must contact vprgrants@utah.edu as soon as they become aware of the opportunity. 10-12 weeks advance notice is requested, whenever possible. Failure to comply with this internal submission process may lead to major delay in the submission process and/or the automatic rejection of a proposal selected by the University of Utah.

All LSO information can be found on the VPR Funding Page: https://research.utah.edu/funding/limitedsubmission.php
The Faculty Small Grant Program (FSGP) seeks to support significant research and creative scholarly projects in colleges that experience difficulty obtaining extramural funding. This program will provide faculty with grants up to $6,000 for a period of two years to support scholarly projects and publications. Please visit the VPR Funding Website for more details! [https://research.utah.edu/funding/index.php](https://research.utah.edu/funding/index.php)

The Distinguished Research Award recognizes outstanding achievements in scholarly or creative research by University of Utah tenured faculty. The URC will provide up to three awards for creative or scholarly achievements. The award is accompanied with special recognition at General Commencement and a $10,000 stipend to pursue research and/or creative pursuits. Please visit the VPR Funding Website for more details! Save-the-Date: NSF CAREER Workshop

The VPR Office and Research Education will be offering a workshop focused on NSF’s CAREER program. The workshop will detail the specific needs of CAREER proposals, and discuss the institutional resources available to support education and assessment plans. Please encourage junior faculty who are interested in integrating research and education to participate.

This workshop will take place Friday, February 5th, 2021.

More details on pre-requisites and enrollment will be provided soon!
AVPRI&C Announcements – Erin Rothwell
Dashboards

3. **Length of entire study, from initiation through closeout:**
   
   Include the amount of time expected to enroll participants and complete all data analysis.

4. **How will participants be recruited or identified for inclusion in the study?**
   
   The IRB does not allow cold-calling as a method of recruitment. All recruitment materials must be attached to the Documents and Attachments page.

   a. **Select all methods that will be used:**
      
      - In-person contact (e.g., patients, students, etc.)
      - Referrals
      - Written or electronic record review
      - Written advertising (flyers, brochures, website postings, newspaper ads, etc.)
      - Posting on the University of Utah's Study Locator Website.
      - Audio advertising (radio and television advertisements, etc.)
        
        The ad script and audio/video recording must be attached to the Documents and Attachments page.
      - From a database or participant pool for which participants have given prior permission to be contacted for research studies
      - Other
